

Got **NUMERACY**?

Mrs S bought a house in 2008 for £120 000 and sold it in 2014 for £144 000.

After paying fees of £6 500, how much profit did she make?

It has been said that Mr C's house price could rise by 6% each year.

Mr C's house is now worth £165 000. Based on a 6% rise per year, how much would his house be worth in 2 years time?
