

w/c 12th March

Got NUMERACY?

This week is National Science Week.

The record for the fastest manned spacecraft was set by the Apollo 10 crew, who travelled at 11km every second.

At this speed, how long would it take to reach the moon, 384 300 km away?

(Answer in seconds please.)

At this speed, how long would it take to reach Mars, 25 million km away?

(Answer in days please.)
