

Got NUMERACY?

Swindon usually has around 215 hours of sunshine throughout June.

Melbourne in Australia usually has around 95 hours of sunshine throughout June.

If this happened this year, how many extra hours of sunshine would Swindon have per day?

If the maximum temperatures in Swindon in a week are

Saturday 22°C,
Sunday 20°C,
Monday 20°C,
Tuesday 21°C,
Wednesday 23°C,
Thursday 20°C

and the mean average temperature for the full week is 20°C, what would the maximum temperature be on Friday?
