Got **NUMERACY**?

5 friends went out for a meal.

The total for their bill came to £145.

If they split the bill equally between them, how much would they each pay?

Sarah went for a meal with 4 friends. The bill came to £124.

She had a bowl of pasta for £12.40, a drink for £3.20 and a dessert for £6.00.

How much would she overpay if the friends split the bill between them instead of calculating it individually?
